

## Autumn Pointe HOA - Approved doors

Members may replace their unit's front door with any door similar in design to the ones shown below. When replacing the garage entry door, only the leftmost door shown below may be used. Note that the doors must be painted with an approved color regardless of the door's color upon purchase. Approval from the Board of Directors must be obtained before replacing the door. Please submit a picture of the door that you will use as replacement when requesting for approval from the Board of Directors.

Replacement doors must:

- Have stucco molding
- Be inswing (left or right)
- If door has glass, the glass must not be stained (no colors)
- Must be painted with the approved color code (#4 <http://autumnpointe.dynns.com/wp-content/uploads/Paint-Colors.pdf>)
- If a security door will be installed, it must be metal and painted with the approved color code (same color code as front door).
